## Simplified solar schematic guide

a = amperage

v = voltage

w = watts

Your BobolinkSolar kit is designed to produce power for many years. We endeavor to use "best" in class control and system componentry. Each piece has been carefully selected and tested to ensure longevity and safety for you and your family.

If this guide helps you set your system voltage; document your panel watt size; determine the size of your solar controller, Inverter size and Battery pack voltage and size. Your'e off to a good start!
